

Products and Certifications

We are proud to offer a wide array of products that will meet virtually every security need in today's world of converged technologies. Our relationships with the industry technology leaders and product manufactures span over 20 years.

We provide technically experienced personnel to support every project. We invest and maintain factory certification in most technology platforms. This includes the initial training as well as the annual certifications for our installation and service technicians. In addition, we offer a variety of the following certifications for our IT, project management, software technicians, engineers and sales staff.

MCSE – Microsoft Certified Systems Engineer
COMPTIA - Network Plus
ASIS PSP
ISN Frontline Project Management

Cisco Certified Sales Executives
Cisco Certified Project Managers
Cisco Certified Field Engineers
