

## VTI “U” Continuing Education Seminar – Tuesday, June 2, 2009

For professionals involved in specifying, managing or deploying security systems

### Details

Courses are offered sequentially and repeated in the am and pm session.

Date: Tuesday, June 2, 2009

When: Choose a Convenient Session  
AM Session 8:00 am – 11:45 pm  
Stay for lunch or come for lunch  
PM Session 1:00 pm – 4:45 pm

Where: VTI Training Facility  
Burnsville, MN

Seating is limited so please, RSVP as soon as possible. You will receive a confirmation with training center directions. Guests are welcome.

### Course Description

1. **“Highly Intelligent Openings”** - As intelligent panels push to the (door) edge of the network, technology continues to evolve toward the door hardware. Your take away will be options to reduce cost and improve operational efficiency.
2. **“Wireless Mesh Networks – Reach the Un-Reachable”** – how can the mesh network deployment go beyond the traditional point-to-point application? Your take away will be a practical understanding of this technology along with the tools to manage your wireless landscape.
3. **“Video Storage and Analytics at the Edge and in the Camera”** – with or without connectivity understand the technology of a self contained camera/recorder/analyzer. Your take away will be a practical understanding of when and how to deploy this technology.
4. **“Know your Specs – Video Compression, Megapixel Cameras, and Pixels Per Foot”** Understand the difference between your “wants and needs” when considering forensic, general surveillance and high detail video images. Your take away will help you make the correct product selection(s) and get the most from your video cameras.
5. **“Scalable, Video-Optimized Storage Technology”** – high availability and redundant video storage that can be used in data centers to store more than video and goes beyond a traditional SAN. This is a session for your IT business partners to attend.

### What is VTI “U”

At the “U” you will hear from industry experts focused on topics for technical or non-technical end-users, consultants, architects and engineers who are required or desire to stay current on technology and its practical application(s).

### For Reservations

RSVP by May 26, 2009 with name or names, company, phone number, and session(s) am or pm you will be attending:
